

The main final products of the NIREAS project are e-learning courses for the operators of the wastewater treatment plants and a methodology for accreditation of competencies. The E-Learning courses will aim to improve the skills of the Operators of Wastewater Treatment Plants on the basis of the professional profile developed in the WET project and will cover the following Units of Competencies:

- Wastewater and Water Treatment,
- Operation of the Plant (Process),
- Maintain Equipment and Installations at Wastewater Treatment Plans,
- Health & Safety.

On the other hand, the methodology for the accreditation of skills and competencies will be specifically suitable for the skills and competencies acquired through e-learning courses and it will be specially adapted in order to meet the needs of the operators of the wastewater treatment plants.
